

Actuarial Services for Risk Managers

Christopher Gross Consulting can help you analyze and manage your risk by providing the following actuarial services for the large corporate insurance purchasers:

- Accurately estimate SIR accruals and captive reserve estimates.
- Optimize your level of insurance retention.
- Help you to allocate insurance costs to operating units in relation to risk.
- Provide risk transfer testing for captives.
- Assist with data base and reporting system design surrounding insurance claims.
- Represent our analysis in meetings with your auditors.
- Provide meaningful reports and information.

Your benefits:

- Understanding the range of risk associated with your insurance program.
- Structuring your retention limits to buy the amount of insurance coverage that fits your risk appetite while optimizing your costs.
- Unlock your insurance data to discern meaningful information.
- Reducing the time and cost of audits pertaining to SIR bookings and captive reserves.

At Christopher Gross Consulting we have significant experience advising executive management groups on risk and reward issues pertaining to insurance coverage. In addition to advising individual insureds, we have worked with some of the largest U.S. insurers and understand the nuances of the economic value of risk as well as working through Sarbanes-Oxley documentation and audit relations for SIRs and reserves.
